PRODUCT DESIGN · DESIGN SYSTEMS · DESIGN STRATEGIES

Dannick *Young*

I design apps. I make them pretty & easy to use. I use AI tools like Cursor for faster development, with better quality, and fewer handoff issues.

Experience

06/2025 - PRESENT

Lead Product Designer

ChronoAI (previously Aelf) · AI Software

i. I build AI products from ideation to production to launch.
ii. Built a design system with reusable components and proper storage structure using Cursor and AI tools, reducing design-to-dev handoff time by 60%.
iii. Created the entire vibecoded structure for product launches, enabling faster iteration.
iv. Work closely with marketing on user acquisition and retention campaigns that drive growth.
v. Run QA across existing AI products and constantly improve the user experience.
vi. Conduct user surveys to gather feedback, then create design strategies based on what users need.
vii. Built a user feedback collection system with AI insights so we can identify pain points faster and fix them quickly.

02/2025 - 06/2025

Senior Product Designer

Aelf · Web3 Blockchain

i. I designed a Web3 mining dashboard.
ii. Simplified the wallet connection flow from 5 steps to 2.
iii. Built two microsites for staking and rewards that work on mobile.
iv. Conducted 20+ user interviews, then redesigned the dashboard layout based on their feedback.

06/2024 - 02/2025

Lead Product Designer

VICI Studio · Design Agency

i. I created reusable design systems with 30+ components for 4 startup clients, enabling 2× faster MVP delivery.
ii. Designed and launched 6 responsive websites and 2 mobile apps from concept to production.
iii. Established a research process: user interviews → synthesis → feature prioritization that all clients now use.
iv. Specialized in helping early-stage startups go from idea to launch.

11/2023 - 06/2024

Product Designer (Hybrid)

BTCC · Web3 Blockchain

i. I redesigned the crypto trading signup flow.
ii. Reduced form fields from 8 to 4, increasing completion rate by 28%.
iii. Designed 3 trading apps for iOS and Android.
iv. Created 15+ landing pages with A/B testing.
v. Used Hotjar heatmaps to identify drop-off points, then redesigned those sections.

11/2021 - 11/2023

Junior Art Director

Ogilvy · Advertising

i. I created 50+ campaign visuals across 8 client brands.
ii. Pitched social media campaign concepts directly to clients.
iii. Produced animated GIFs and videos for Instagram and Facebook that increased engagement by 30%.
iv. Wrote design system documentation for 3 major accounts.

Why You / Why Now

The AI-Assisted Designer

I use Cursor and AI tools to close the design-to-development gap. While most designers hand off static files, I build live production that developers can ship immediately. This means faster launches, fewer handoff issues, and products that actually match the design.

Best For

AI and Web3 companies building from 0 to 1. Teams that need someone who can design beautiful interfaces, build design systems, conduct research, and ship production-ready code. Companies ready to move fast without sacrificing quality.

The Receipts

28% increase in signup completion. 60% faster design-to-dev handoff. 30+ reusable components. 50+ user interviews. 6 websites and 5 apps shipped. Built AI-powered feedback systems. Reduced support tickets by 45%. These aren't just numbers, they're proof I solve real problems.
